This is the first office action for application number 10/626,641, Tool Suspension Device, filed on July 25, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,897,001 to Dembicks. Dembicks discloses a tool suspension device, comprising: a main body (120) having a first side formed with a mounting hole (124) and a second side provided with a mounting portion (128); the mounting hole of the main body has periphery formed with a catch edge (126); the mounting portion of the main body has an inside formed with a mounting space (132) communicating with the mounting hole; wherein the mounting portion protrudes outward from the second side of the main body; wherein the mounting space is directed in an axial direction of the mounting portion of the main body; and a retaining member (114) mounted on an end face of the mounting portion of the main body and extended into the mounting space of the mounting portion of the main body.

Allowable Subject Matter

Claims 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
